

QUALITY POLICY

Sirena S.p.A. has been designing, developing, and manufacturing acoustic and visual signaling devices since 1974. The experience gained over the years allows us to provide our customers with top-of-the-range devices, suitable for a wide variety of technical requirements in the industrial, civil, automotive, fire protection, evacuation fields, as well as for devices located in areas classified as explosive atmospheres.

The company considers Customer Satisfaction to be the primary objective to pursue and enhance, by anticipating requests and expectations and working in close collaboration with the customer from the very early stages of product development.

For Sirena S.p.A., satisfying the customer means offering products with excellent technical and qualitative characteristics, in compliance with all applicable mandatory requirements.

Sirena S.p.A. strongly believes in continuous improvement of the organization, involving all collaborators in every process and making each resource trained and aware of their own responsibilities.

A careful management of human resources, with strategies based on motivation, training, and awareness, are the key levers that Sirena S.p.A. uses to increase personnel skills and promote a culture of Quality, while operating in a climate of effective cooperation between all company functions.

Effective and professional communication is, for us, the foundation for achieving good collaboration with all stakeholders involved in the company's context.

Sirena's Management annually defines the priority areas of action and improvement objectives; each company function, based on these guidelines, will develop the necessary activities to achieve the goals.

Sirena S.p.A. pursues its objectives by taking into account the needs and expectations of interested parties, giving priority to aspects related to the customer, and including in its improvement plan the main critical issues emerging from the company's Risk and Opportunity assessment.

Sirena S.p.A. manufactures its products in compliance with occupational health and safety requirements, while protecting the environment and properly disposing of hazardous waste, as required by law.

This Quality Policy applies to all resources within the organization and to all stakeholders connected with Sirena. This Quality Policy has been reconfirmed for the year 2025.
